To the Regents of the University of California (UC) HEALTH SERVICES COMMITTEE (HSC) members.

Re: Please calendar for 8/13/19 and vote to stop the UC name from being misused to cause discrimination of the sick, disabled and dying via flawed health policy papers, physician educational materials, claims handling practices and in mold litigations.

This request to you is also made by video. Please see it at: <https://youtu.be/OPTp9n055mc>
"6.11.19 UC Regents HSC Meeting. Agenda Item Request for 8.13.19"

Dear Regent

I spoke at the April 2019 HSC meeting. To quote from your minutes *"Sharon Kramer expressed concern about bad living conditions for families living on U.S. military bases and health hazards associated with mold. These hazards should not be downplayed or discounted."*

I provided documentation which brought to your attention that a 2006 medical journal publication with the UC name on it had made its way into the March 2019 Navy and Marine Corps Public Health Center (NMCPHC) directive for military physicians.

I provided documentation to you which showed that I was able to help troops and their families dodge the bullet of the junk science that was about to be used against them as proof that the moldy military housing is not harming them. The way I was able to do this was by sending one email to NMCPHC showing that what they were teaching the doctors is based on junk science discredited by Institute of Medicine (IOM). It was penned by expert defense witnesses in mold litigations. (Attached hereto as EXH 1 is the email communication with NMCPHC)

I also provided documentation that the unofficial seal of the UC is being misused by Dr. Andrew Saxon, Emeritus UCLA, on reports that he is writing when serving as an expert defense witness, interstate, in mold litigations; and that he is misstating fact for profit when enabling insurer fraud in mold litigation. (Attached hereto as EXH 2 is an excerpt of one of Dr. Saxon's litigation defense reports from 2017).

With all due respect, the HSC really needs to take measures to shut down this scam that continues to harm thousands and that has relied heavily on the UC name as the legitimizing factor for bogus science 2002. (Attached hereto as EXH 3 is the 2007 Wall Street Journal article *"Amid Suits Over Mold Expert Wear Two Hats, Authors of Science Papers Also Serve for the Defense in Mold Litigations"*, explaining how and why the scam came to be; and describing how the UC has profited from it since 2002)

People have been asking the UC Regents to address this problem since 2010. (Attached hereto as EXH 4 is the April 2010 request to the Regents and the attached exhibits showing how the National Apartment Association (NAA) and the U.S. Chamber of Commerce are misusing the UC name to promote false science in mold litigations.). Dr. Saxon was also an expert defense witness in this case, as was his co-author of the junk science, Bruce Kelman.

The public needs your help. Please make this deeply seated fraud stop.

1. Please request that the Journal of Occupational and Environmental Medicine (JOEM) retract the paper from publication, titled "Adverse Human Health Effects Associated with Molds in the Indoor Environment" by Bruce J. Kelman & Bryan Hardin of Veritox, Inc. and **Andrew Saxon of UCLA**. It was sunset as a position statement of ACOEM in 2015, yet one would never know it from looking at their journal. It is still used extensively in mold litigations.

2. Please request that the U.S. Chamber Institute for Legal Reform (ILR) & nonprofit Manhattan Institute Center for Legal Policy (CLP) retract the paper from publication titled "A Scientific View of the Health Effects of Mold"; with stated authorship of Bruce J. Kelman, Bryan Hardin, Coreen Robbins of Veritox, Inc. and **Andrew Saxon of UCLA**. [Dr. Saxon has stated under oath that he did not co-author this paper. The contract, cancelled check made to Veritox, and under oath testimony confirm that only Mr. Kelman and Mr. Hardin co-authored it.]

3. Please request that the Journal of Allergy and Clinical Immunology (JACI) retract from publication the paper titled "The Medical Effects of Mold Exposure" with stated authorship of **Andrew Saxon of UCLA**, Robert Bush of University of Wisconsin, Abba I. Terr of Stanford University, Robert Wood of Johns Hopkins Hospital, and Jay Portnoy of Children's Mercy Hospital of Kansas City from publication. [It was sunset as a position statement of AAAAI in 2011. Yet one would never know that from looking at their journal. It is still used in mold litigations. Dr. Portnoy has stated under oath that he did not contribute to this paper after Dr. Saxon rewrote his work. Email communications establishes that Dr. Portnoy was not even aware it had been published in 2006, until I told him; and that he does not agree with its findings]

4. Please cause Dr. Andrew Saxon of UCLA (retired) to cease misusing the UC unofficial seal when writing dishonest reports as an expert defense witness in mold litigations.

I am requesting that you schedule this matter to be addressed by HSC vote at the August 2019 HSC meeting; and that you allow me to make a presentation to you corroborating why it is in the public's best interest that HSC cause the UC name and other assets to cease being used to commit insurer fraud and horrific discrimination in the mold issue, nationwide. (Attached hereto as EXH 5 is a March 2019 article about me from Health Impact News. It describes why and how I know so much about this deeply seated fraud and the harm it continues to cause the public]

Thank you for your consideration of this matter.

Sincerely,

Sharon Noonan Kramer
