

From Mrs. Kramer Re: HHS's Moldy Seeds of Deception Are Buried & Thriving In Manure Manufactured In California Courts

From: Sharon Noonan Kramer (snk1955@aol.com)

To: samuel.bagenstos@hhs.gov; andre.jones@hhs.gov

Date: Wednesday, June 21, 2023 at 03:23 PM PDT

To the General Counsel of HHS Samuel Bagenstos & HHS OGC receptionist, Andre Jones

Dear Andre,

Thank you again for taking my calls and confirming that you and Mr. Bagenstos are receiving my emails. I sincerely appreciate you saying you will make sure that Mr. Bagenstos knows that he is also receiving my messages via email; and that he may also read them at the [blog](#) where I am keeping a running log of my communication with you all.

As you know, I recorded what I said to you on June 12, 2023. The reason that I did not record you because I think is rude to record subordinate government employees, who are just doing their jobs of relaying important information to their bosses from members of the public.

One may hear again what I said that caused you to confirm receipt of my emails that are also being sent to Mr. Bagenstos at this link:

<https://youtu.be/L-tuAhDU7mU>

I thought the June 12th call was my tenth call since April 4, 2023. By checking my call log, I can see that it was my eighth. This is for a total of over 30 minutes of asking HHS OGC clerical staff to help cause Mr. Bagenstos to contact me back about the subject corruption problem plaguing HHS.

My conversations with you, Andre, are longer than it took me to explain the origin of the subject crime (that is based on the scientific fraud of SLAPP plaintiffs HHS's Bryan HARDIN and his business partner Bruce KELMAN); and the fraudulent documents in the case-fixed SLAPP (that are used to frame me as libeling them) at a Chronic Inflammatory Response Syndrome (CIRS) Conference in Arizona in November of 2015:

[Fraud Funded by US Govt Over Mold Disabilities by S Kramer - YouTube](#)

Mr. Bagenstos,

Your thus far, demonstrated lack of respect for a brutally retaliated against whistleblower of ongoing corruption at HHS, is simultaneously displeasing and scaring me.

Is there some reason that you do not even have the courtesy to respond to my reporting of an epic and ongoing crime involving HHS, that Secretary Becerra has already pledged to investigate while being video recorded?

I am typically a fairly nice woman. But if I am backed into a corner with many lives devastated by my being there, my Irish roots come up from the depths of my soul.

I will fight with all my might until my captors surrender, to save those devastated lives from oppression and fraud by government.

As I have already shown you, while being video recorded on February 9, 2017, HHS Secretary Xavier Becerra pledged to investigate how Administrative Presiding Justice of the California Fourth District Division One Court of Appeals Judith MCCONNELL, et.al. getting away with systematically framing me for libel for the below accurate sentence, is "*harming a lot of people across the United States*".

"Upon viewing documents presented by the Haynes' attorney of Kelman's prior testimony from a case in Arizona, Dr. Kelman altered his under oath statements on the witness stand."

I wish I had as much respect for you and Secretary Becerra, as I do for your receptionist, Andre. Currently, I do not. Part of what I said to Andre, now over a week ago, that caused him to remind you that you are also receiving emails from me, is:

Secretary Becerra, I have him on video pledging to investigate this. This is just outrageous. I've moderated a United States Senate Staff Briefing over this. I'm a medical journal published author. I spent two days in jail for refusing to be coerced to lie about this. I've been sending you all emails since April. This is like my tenth call. Is Mr. Bagenstos available? Could I possibly speak to him? The fraud that HHS is promoting is being quoted by the Inspector General of the Department of Defense. And what its being used for is to deny liability for the military housing landlords who are crippling these military families in the moldy housing. The defense attorneys and defense experts are like "No, huh-uh. We haven't done anything wrong".

What does a girl have to do to get a drink around here? I just need a call back.

This is my eleventh email to you since April 10, 2023. I have been begging you for help for science, justice, the people and me. I have also asked you multiple times to share my emails with Secretary Becerra.

IF ANYTHING HAPPENS TO ME, CONSIDER MY BLOOD ON YOUR HANDS

As I have informed you, there are many prominent people involved in creating and covering up the moldy seeds and weeds of deception at HHS that are causing deaths, destitution, and discrimination of those who acquire brain injuries, lung bleeds, and additional forms of maladies from water damaged buildings (WDB) exposures.

I have shown you that there are more influential people involved in manufacturing the nurturing manure via the criminal case fixing of the California SLAPP matters of *Bruce J. Kelman & GlobalTox, Inc. v. Sharon Kramer* (May 2005) and *Bruce J. Kelman v. Sharon Kramer* (November 2010).

I have shown you the direct evidence that I have already been jailed once for refusing to be coerced by a judge and an attorney to lie; and that while I was in jail they gave me a false criminal record for my alleged civil contempt of (uncivil) court.

I have shown you that since February 2017, Secretary Becerra has known of the physical retaliation for my refusing to be silenced about the ongoing harm from the California courts being used to frame me as libeling HHS' policy deformer, HARDIN and KELMAN.

I have explained to you multiple times that I am sincerely afraid that I am going to be physically hurt again (or worse) for continuing to tell the truth to decision makers who can bring the collusive crime to an end with accountability for the system-gamers involved.

I live my life constantly looking over my shoulder. I know that it only takes one influential person to deem that government assets should be used *again* to hurt me in retaliation for my continuing to tell the truth. It only takes one person to decide that I need to be permanently shut-up by use of gov't assets or not.

I have told you that your lack of response as the General Counsel of HHS scares me, because your silence is the same as silent consent for the retaliation. So is Secretary Becerra's.

I think I have made it very clear that the reason that I live my life always looking over my shoulder, is **directly** because of some short sighted, callous, and disingenuous things that Secretary Becerra said when I first came to him for help in February 2017; and there was a camera rolling.

It is not my fault that Secretary Becerra chose to make remarkably obtuse and bias-demonstrating "harmless error" jokes about what I told him of this ongoing criminal matter involving HHS and the California courts.

I did not put the words in his mouth pledging to cause a "*department of justice*" and "*my office*" investigation of case fixing California jurists, HHS policy deformers, et.al. later.

I did not appoint him to be the White House Cabinet member helming HHS with the power and authority to bring this crime to an end via becoming a man of his word. I did not appoint you to be HHS's lead legal counsel with a duty to help Secretary Becerra do his best for the people.

Although I am a California Democrat, I also did not vote for Secretary Becerra's fellow former California Attorney General Kamala Harris to be second in command of the United States.

Those powerful positions in government are caused by decisions of President Joseph Biden, himself. Ultimately it is his responsibility as the Commander in Chief to assure his subordinates are doing their jobs.

Yet, to my knowledge I am the *only one* who is terrified that I will be physically hurt (or worse) for continuing to seek help to end subject ongoing public fleecing -- that is not caused by any of *my* decisions.

BACK ME INTO A CORNER WHILE GIVING ME WEAPONS AND I WILL FIGHT BACK HARD

I have known since December 2020 when I heard that Xavier Becerra was nominated to be HHS Secretary, that I would soon have the HHS Secretary on video pledging to investigate why the California courts are used to frame me as libeling HHS's policy deformers in the mold issue, while "*harming a lot of people across the United States*".

I have not put another post on Katy's Exposure blog since the day after Secretary Becerra's appointment was confirmed on March 15, 2021. I knew that at some point in the future I would be using that post to show Secretary Becerra the errors of his ways via making fun of me and pledging to investigate the crime involving HHS -- later.

The stakes are high for many via my having the *only government decision maker ever video recorded pledging to investigate this ongoing criminal matter, then becoming the White House cabinet member stewarding HHS.*

Me having Secretary Becerra on video pledging to investigate the crime, coupled with me having HHS GC's email address are powerful weapons in the war on corruption at HHS and the California courts.

Having such powerful weapons in my hands, increases the risk that those with vested interests may act to see me stopped, permanently, from being able to use them.

I hate to be dramatic, but I **really am scared** because of all that I can prove about HHS continuing to be enabled to be severely corrupted re: maladies caused by WDBs; with the California courts continuing to be enabled to be corrupted to cover it up and keep the lucrative racket thriving.

I have days when I wish I had never met Secretary Becerra. He was short-sighted to let himself be video recorded making fun of me and pledging to investigate -- later- in response to my asking him one "yes" or "no" question. On February 9, 2017, I said:

With all due respect, Chief Justice [Tani CANTIL SAKAYUE], your courts have spent twelve years harassing me and framing me for libel for those words [by the creation and continued usages of void judgments, fraudulent liens and **fraud concealing remittiturs.**

Judge DATO violated Penal Code 134 by leaving a void judgment in effect. **Justice MCCONNELL has been obstructing its vacating.**

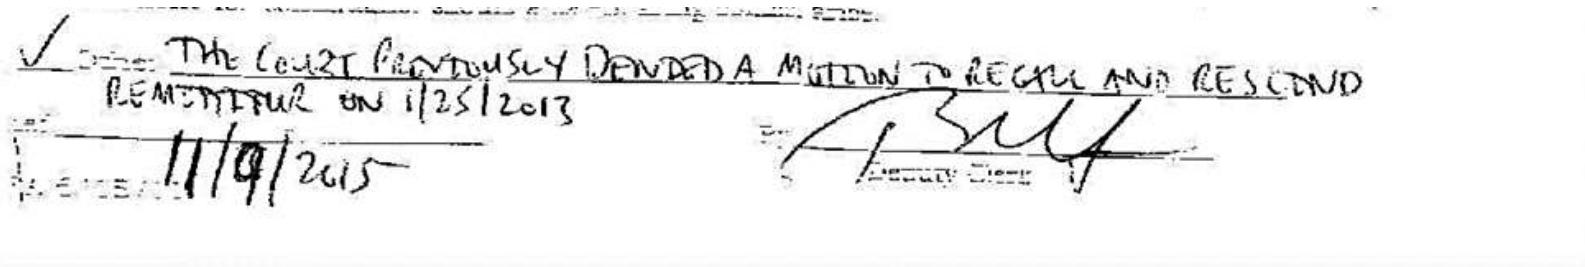

Um, what I really came here to ask is for the Attorney General of the State of California [Xavier Becerra] to investigate these unpunished crimes, CJP [Commission on Judicial Performance] unpunished crimes. Because it's harming a lot of people across the United States. **Will you do that?**

THE BIGGEST PIECE OF MANURE THAT IS COVERING UP & NURTURING THE SEEDS & WEEDS OF DECEPTION AT HHS UNDER SECRETARY BECERRA'S WATCH

Again, the reason HHS is enabled to continue to grow the weeds of deception in the mold issue, is directly because Secretary Becerra has not yet honored his pledge to investigate why California Fourth District Division One Administrative Presiding Justice Judith MCCONNELL will not lawfully cease framing me as libeling HHS's policy deformers -- namely former U.S. Assistant Surgeon General/CDC NIOSH Deputy Director/toxicologist Bryan HARDIN and his business partner, toxicologist Bruce KELMAN.

Thus far, no one will hold her accountable for the growing harm from the unmitigated fraud upon the court when case-fixing SLAPP, for and with, HHS policy deformers as SLAPP plaintiffs. **If MCCONNELL is not held accountable, then no one else can or will be, either.**

One must remove the nurturing manure to kill the growing weeds at its roots at HHS. Below is from the documents that Secretary Becerra read as a vetting-before-voting panelist of the Commission of Judicial Appointments (COJA) in February 2017.

It is one of the documents that Secretary Becerra pledged to investigate (later) how it is used for "harming a lot of people across the United States". It was attached as Exhibit 7.

November 9, 2015 is the eighth time since January of 2010, that MCCONNELL refused to lawfully recall and rescind the appellate court remittiturs in the matters of Kelman & GlobalTox v. Kramer and Kelman v. Kramer (and/or to recuse herself from the case).

Punishment for obstructing the lawful recall of the remittiturs in the case-fixed SLAPPs is what is needed to stop framing me as libeling HHS and its policy deformeders; and to kill the roots of the growing weeds at HHS with acknowledgement that this matter is indeed collusively criminal.

(9 Witkin, Cal. Procedure 4th ed. 1997) Appeal, § 733, pp. 762-763.) *"If the remittitur issues by inadvertence or mistake, or as a result of fraud or imposition practiced on the appellate court, the court has inherent power to recall it and thereby reassert its jurisdiction over the cause. This remedy, though described in procedural terms, is actually an exercise of an extraordinary substantive power. Correction of the clerk's clerical or other mistakes in the remittitur is a very minor aspect of the proceeding; its significant function is to permit the court to set aside an erroneous judgment on appeal obtained by improper means. In practical effect, therefore, the motion or petition to recall the remittitur may operate as a belated petition for rehearing on special grounds, without any time limitations."*

I DID NOT FIND THIS TO BE THE LEAST BIT FUNNY OR HARMLESS

It was remarkably obtuse of Secretary Becerra to say the following at the COJA hearing on February 9, 2017.

If you'll allow me to interject for Mrs. Kramer's sake, that the department of justice is there, available. If she has some matter she'd like to bring to the attention of my office, we'll certainly consider that. We always will. We always should.

But your [Appellate Justice Nominee Dato's] stock went up when Judge Pressman said you eat cheap tacos. So, I think Judge Pressman was talking to us when he talked about harmless error. And so my questions, Madam Chief Justice, are very few. [NONE, NADA, ZILCH]

Because I suspect we're in the room of EXTREMELY HARMLESS ERRORS and we look forward to the opportunity to elevate Judge Dato to the Fourth District. Aye. [DOH!]

Secretary Becerra has left me in the precarious position of having to choose to remain silent about the display of above-the-law mentality at the COJA hearing (which would be the same as my agreeing to silent consent for the seeds of deception to grow at HHS in the covering-manure manufactured in the California courts); or

to continue to speak of the elitist-illustrating stupidity of his words, while seeking justice for science and the people (which is the same as knowing that with each email I send to you, Mr. Bagenstos, the stakes of fierce retaliation become greater for me).

I hope you have the foresight to be sharing my emails with not only Secretary Becerra; but also President Biden, Vice President Harris, and Attorney General Garland.

Don't forget that I have been making trips to Washington, D.C. regarding this matter since 2004.

You are not the only government decision maker to whom I have sent emails and can prove that you are receiving them. I also have many reply emails in my files. One of hundreds of examples of correspondences regarding this matter:

Hello Sharon,

You are confirmed! I'm afraid I have another meeting I have to attend at 11:30 – I hope that's alright. I look forward to discussing these issues with you further on Friday.

Best,

Spencer

Hi Spencer,

Confirming our meeting for 3/22 at 11.

I want you to understand that I am coming to town to shut down the junk science once and for all that it is allegedly proven the toxins of mold in the military housing can't cause the symptoms that the families are claiming. Sadly, the scam has the University of California's name literally written all over it.

See the below link w/working links.

<https://katysexposure.com/2019/03/12/3-11-19-request-for-u-s-senate-intervention-to-stop-fraud-retaliation-in-the-mold-issue/>

I am also seeking Senator Harris's help to make the State of CA and her courts stop criminally terrorizing for exposing this scam 14 years ago. <https://healthimpactnews.com/2019/one-womans-relentless-pursuit-of-the-truth-as-a-toxic-mold-whistle-blower/print/>

See ya Friday!

Sharon

Hello Ms. Kramer,

Thank you again for calling our office. I very much look forward to our meeting. The information you shared from Doctors Shoemaker and McMahan is very helpful and I'm reading it with great interest. Please let me know if you have any trouble arriving (we've had a more snowy winter than usual) and let me know if you have any other information you'd like to share in the meantime.

Thank you,

Spencer

Subject: RE: moldy military housing and retaliation for exposing the fraud.

Dear Spencer,

Thank you for taking my call and agreeing to meet with me on March 22nd at 11am in Senator Harris's DC office. My contact phone number is 760-822-8026.

To reiterate our brief conversation, it really is Senators Harris and Feinstein who are the most capable of shutting down the military housing mold problem and the retaliation that occurs when people expose it.

This fact may be a bit embarrassing for them because I have been asking Senator Feinstein for help to shut down the underlying fraud which causes it since 2005; and **Senator Harris for help to shut down the criminal retaliation behind it in the State of CA since 2011. Unfortunately, CA Atty Gen Becerra is following Senator Harris' footsteps.** (See video toward the bottom of this email titled "The Toxic Judgment". Fast forward to about an hour and a half in)

But that was yesterday and today is today.....

I have also known enough of the matter to be able to cause the late Senator Edward Kennedy to cause a federal GAO audit of the mold issue in October of 2006.

I am not a stupid woman.

Know that should I experience an early demise; my blood is on your and Secretary Becerra's hands for repeatedly ignoring my pleas for help for science, justice, the people, and me.

THE GROWING WEEDS OF DECEPTION AT HHS

Again, from the CDC "[Basic Facts About Mold and Dampness](#)" webpage that was updated with the below disinformation days before Christmas 2019:

A link between other adverse health effects, such as [acute idiopathic pulmonary hemorrhage among infants](#), memory loss, or lethargy, and molds, including the mold [Stachybotrys chartarum](#) has not been proven. There is no blood test for mold.

Again, do not even think about removing those lying words from the key CDC webpage without investigating who authorized their addition to the page in 2019, and who reviewed the page under Secretary Becerra's watch. To quietly remove those words in the dark, only serves to bury the seeds and roots of the weeds of deception deeper in the covering manure.

It is common knowledge that the above is pure homegrown disinformation at HHS. If you do not believe me, maybe you will believe the Evidence Based Medicine crowd. UpToDate as published in Medical News Today, April 2023:

What is pulmonary aspergillosis?

Pulmonary aspergillosis (PA) is any lung condition that stems from the *Aspergillus* fungus. There are several forms of pulmonary aspergillosis, including allergic, chronic, and invasive. According to the [CDC](#) all forms of PA cause a cough and shortness of breath. Contrastingly.. Invasive PA can present with the following additional symptoms: [coughing up blood \[pulmonary hemmoraging\]](#).. If invasive PA spreads to other body parts, it can cause [nonpulmonary symptoms](#). For instance, if the [infection reaches the brain, a person can develop neurological symptoms](#).

**THIS WOULD BE MUCH EASIER TO EXPLAIN IF YOU AND SECRETARY BECERRA WOULD TALK TO
ME**

I updated the blog that I am using to try to communicate with you, and thus with Secretary Becerra. As I have informed you, I am trying to do this under the radar. I do not want any more fighting. I want the crime and the harm from it ended.

I am not backing down until this crime (with its abusive weaponization of government assets) is ended with accountability. It is beyond disgusting that this continues when multiple members of the White House Cabinet, executive branch employees, and legislators know about it; but have done zero to stop its devastation of military families and countless additional defrauded Americans.

Also disgusting is that I must frequently ponder the possibility of my early demise. This is because I have Secretary Becerra on video putting his foot in his mouth via making “*harmless error*” jokes with California jurists about this crime involving abuse of HHS and the California courts — *prior to* being appointed HHS Secretary.

Then abandoning his also video recorded pledge to investigate his not funny SLAPP fixing black robed friends and HHS policy defor mers as case fixing -- while DIRECTLY causing the crime to persist with no accountability now under his stewardship of HHS.

With my twelfth email, I am going to have to start going into the details of the science. I don't think you all are smart enough to understand it without asking me a single question. That is not an insult.

I have never met a single person who can understand how two toxicologists armed with a calculator and a close association to HHS, could reek so much shear Hell for over twenty years, without asking even one question. It is an elaborate disinformation machine that has grown from one bad seed being planted in and nurtured by manure.

The bad seed is the dishonest toxicological risk model by SLAPP plaintiffs' HARDIN and KELMAN, that was first published on the website of the American College of Occupational and Environmental Medicine (ACOEM) on October 27, 2002:

ACOEM EVIDENCE-BASED STATEMENT

Adverse Human Health Effects Associated with Molds in the Indoor Environment

In recent years, the growth of molds in home, school, and office environments has been cited as the cause of a wide variety of human ailments and disabilities. So-called "toxic mold" has become a prominent topic in the lay press and is increasingly the basis for litigation when individuals, families, or building occupants believe they have been harmed by exposure to indoor molds. This evidence-based statement from the American College of Occupational and Environmental Medicine (ACOEM) discusses the state of scientific knowledge as to the nature of fungal-related illnesses while emphasizing the possible relationships to indoor environments. Particular attention is given to the possible health effects of mycotoxins, which give rise to much of the concern and controversy surrounding indoor molds. Food-borne exposures, methods of exposure assessment, and mold remediation procedures are beyond the scope of this statement.

Fungi are eukaryotic unicellular or multicellular organisms that, because they lack chlorophyll, are dependent upon external food sources. Fungi are ubiquitous in all environments and play a vital role in the Earth's ecology by decomposing organic matter. Familiar fungi include yeasts, rusts, smuts, mushrooms, puffballs, and bracket fungi. Many species of fungi live as commensal organisms in or on the surface of the human body. "Mold" is the common term for multicellular fungi that grow as a mat of intertwined microscopic fila-

and environmental sanitation measures are observed, for example, in organ transplant isolation units.

Molds and other fungi may adversely affect human health through three processes: 1) allergy; 2) infection; and 3) toxicity. One can estimate that about 10% of the population has allergic antibodies to fungal antigens. Only half of these, or 5%, would be expected to show clinical illness. Furthermore, outdoor molds are generally more abundant and important in airway allergic disease than indoor molds, leaving the latter with an important but minor overall role in allergic airway disease. Allergic responses are most commonly experienced as allergic asthma or allergic rhinitis ("hay fever"). A rare, but much more serious immune-related condition, hypersensitivity pneumonitis (HP), may follow exposure (usually occupational) to very high concentrations of fungal (and other microbial) proteins.

Most fungi generally are not pathogenic to healthy humans. A number of fungi commonly cause superficial infections involving the feet (*tinea pedis*), groin (*tinea cruris*), dry body skin (*tinea corporis*), or nails (*tinea onychomycosis*). A very limited number of pathogenic fungi, such as *Blastomyces*, *Coccidioides*, *Cryptococcus*, and *Histoplasma*, infect nonimmunocompromised individuals. In contrast, persons with severely impaired immune function, for example, cancer patients receiving chemotherapy, organ transplant patients receiving immunosuppressive drugs, AIDS patients, and so

Some species of fungi, including some molds, are known to be capable of producing secondary metabolites, or mycotoxins, some of which find a valuable clinical use, for example, penicillin and cyclosporine. Serious veterinary and human mycotoxicoses have been documented after ingestion of foods heavily overgrown with molds. In agricultural settings, inhalation exposure to high concentrations of mixed organic dusts, which include bacteria, fungi, endotoxins, glucans, and mycotoxins, is associated with organic dust toxic syndrome, an acute febrile illness. The present alarm over human exposure to molds in the indoor environment derives from a belief that inhalation exposures to mycotoxins cause numerous and varied, but generally nonspecific, symptoms. Current scientific evidence does not support the proposition that human health has been adversely affected by inhaled mycotoxins in the home, school, or office environment.

Allergy and Other Hypersensitivity Reactions

Allergic responses to indoor molds may be immunoglobulin E (IgE) or immunoglobulin G (IgG) mediated, and both types of response are associated with exposure to indoor molds. Uncommon allergic syndromes, allergic bronchopulmonary aspergillosis (ABPA) and allergic fungal sinusitis (AFS), are briefly discussed for completeness, although

ments (myphae). Exposure to molds and other fungi and their spores is unavoidable except when the most stringent of air filtration, isolation,

sive drugs, AIDS patients, and patients with uncontrolled diabetes, are at significant risk for more severe opportunistic fungal infection.

indoor mold has not been suggested as a particular risk factor in the etiology of either.

HELP! HELP! HELP! Talk to me!

Mrs. Sharon Noonan Kramer

P.S.

Below are the emails that I have been sending to HHS General Counsel Bagenstos's email address along with his receptionist's email address. One can read them again at [CA Atty General Becerra Abets Criminal Cover Up of CDC's Scientific Frauds in the Mold Issue – See Video | Katy's Exposure \(katysexposure.com\)](#).

Email 1 2023.4.10 3PM

Subject: "SOS from retaliated against HHS environmental policy reformer"

In this email I show the General Counsel of HHS where to watch the videos of Secretary Becerra making "harmless error" joke s with California jurists and pledging to investigate their SLAPP fixing for policy deforming/expert witness/SLAPP plaintiffs later.

Email 2 2023.4.10 4PM

Subject: "From Sharon K. Resending Part I Re: SLAPP fixing in CA for HHS policy deformers"

In this email I show that the Federal GAO stands ready and willing to help. They already know where much of the problem lays.

But they cannot audit what they are not directed to audit.

Email 3 2023.4.10 4PM

Subject: "Part II From Sharon K. SLAPP fixing for HHS environmental policy deformers"

In this email I show that HHS has always been a concealed real party in interest to case-fixed California SLAPP. I explain that I am afraid I am going to be hurt for reminding Secretary Becerra that he has already pledged to investigate the crime.

Email 4 2023.4.10 4PM

Subject: *"Part III From Sharon K. SLAPP fixing for HHS environmental policy deformers"*

In this email I explain how it is known that Secretary Becerra has extensive personal knowledge of the crime because he was forced to read and hear about it as a vetting-before-voting panelist of the California Commission on Judicial Appointments (COJA) in February 2017.

Email 5 2023.4.10 4PM

Subject: *"Part IV From Sharon K. SLAPP fixing for HHS environmental policy deformers"*

In this email I show that there are many people who know that I am the one who has always been telling the truth about the corruption in HHS and associates' policies and the aiding and abetting judicial case-fixing of SLAPP in California. But nothing changes until this matter is rightfully acknowledged as a crime by Secretary Becerra, et.al.

Email 6 2023.4.14 5PM

Subject: *"SOS! Sec Becerra Shields A Disinformation Machine That Cripples Military Families, et.al."*

In this email I show that this crime involving HHS and its profiteering policy deformers/medico-legal expert defense witnesses/SLAPP plaintiffs should have been ended long ago. It was not, because someone from Senate HELP deleted the following from the scope of the GAO audit that Senator Kennedy ordered at my urging in October of 2006:

"What medical and scientific standards are used in determining the admissibility of evidence of both acute and persistent health consequences resulting from exposure to mold? Which individuals and organizations have promulgated these standards and what, if any, conflicts of interest exist regarding these standards?"

Email 7 2023.5.5 4PM

Subject: *"Part I End the Cover Up of HHS's BIG LIE that Moldy Buildings Don't Cause Brain Injuries"*

In this email I show that I have been giving interviews since October 22 in anticipation of bring this matter to Secretary Becerra's attention again. I show the links of where to watch and hear what I have said.

Email 8 2023.5.8 9AM

Subject: *"Part II End the Cover Up of HHS's BIG LIE that Moldy Buildings Don't Cause Brain Injuries"*

This is the email which shows that Secretary Becerra was made aware of my jailing for refusing to be coerced by a judge and the SLAPP plaintiffs' attorney to lie — prior to his joking about it and pledging to investigate the crime involving HHS later. I also show that people are threatened with retaliation by the HHS policy deforming/SLAPP plaintiff's attorney if they help bring his ongoing criminal matter to public light.

Email 9 2023.5.23 7AM

Subject: *"Mr. Bagenstos, Your Silence is Scaring Me"*.

In this email I show (some of) how I know it was an executive level decision at CADOJ for Secretary Becerra to abandon his pledged investigation of SLAPP fixing for HHS, et.al.; and that the CADOJ employee who sent me the denial is a former HHS and Senate Permanent Subcommittee on Investigations (PSI) attorney, who was hired at CADOJ after Secretary Becerra made the, thus far, disingenuous pledge.

Email 10 2023.6.5 7AM

Subject *"WHO is Re-corrupting HHS re: Mold & Biotxin Illnesses?"*

In this email I showed that someone corrupted a key CDC webpage days before Christmas in 2019. The corruption is purpose d to keep the highly lucrative conspiracy theory viable in government backed policies, physician education and courts (i.e. that moldy buildings do not cause brain injuries, lung bleeds, and additional forms of inflammation throughout the body.) I showed the documentation from a federal matter in 2009 in which federal employees were deemed disabled with brain injuries, etc. from their moldy federal place of employment.

I offered to show how the 2019 corruption of the CDC webpage corrupted the Office of the Inspector General (OIG) oversight of the Department of Defense (DOD) data base re: the true maladies caused by moldy military housing (in a report issued by OIG DOD in April of 2022).

I also offered to show how the corrupted CDC webpage is used to miseducate physicians associated with the government-backed Association of Occupational and Environmental Clinics (AOEC) that are located at universities throughout the United

States.

I also offered to provide MORE of the direct evidence of how I know this crime that originated with HHS involvement circa 2001, is growing and is nurtured via being “covered with the manure” of Justice Judith MCCONNELL getting away with obstructing the vacating of the fraudulent court documents that she and others continue to use to harass and frame me as libeling HHS’s policy deformers.
